**Subject:** Microsoft settlement

Are you people insane? Your "settlement" will do -NOTHING- to protect consumers and competitors. In fact, since you apparently haven't read your own settlement document, you should be aware that Microsoft can "interpret" its way out of all your deals. If this is allowed to pass, I wouldn't discount the possibility that the DoJ has been bribed into throwing the case, and I hope the DoJ gets investigated for this farce.
